Shaping Alaska's Future

Academic Excellence in Science

Dahlia Berns

Despite changes from in-person to remote learning and competing priorities outside of the classroom, Dahlia always put forth great effort and produced high quality work in Environmental Science. From her willingness to participate in class to her ability to communicate her needs, Dahlia has been an outstanding student. Her passion for life science is apparent and her ability to self-advocate will take her to great heights. KHS is excited to see what Dahlia's future holds!
