Janny Eng

Janny is taking a double-load of science classes this year, chemistry and AP Physics, and is excellent in both. She is the type of student who simply “gets it” almost all the time, and during the few times she struggles to master a concept, she works tirelessly until she succeeds. She treats every assignment with precision and care, no matter what. Despite her extracurriculars and obligations outside school, Janny completes all of her work on time, every time. Janny’s motivation and determination show what true dedication to education looks like.
