Academic Excellence in Architectural Drafting

Fisher Gandel

This year's Academic Excellence in Architecture Award goes to Fisher Gandel. This is Fisher's first year as a student in Architectural Drafting. He has an amazing ability to design and create valid solutions to Architectural problems. Fisher asks very insightful questions about his projects and has shown great commitment to producing high quality work. He goes the extra mile to see to it that his work is of great quality and that he meets the deadlines set for him. One specific characteristic that makes Fisher stand out from his peers is his ability to work at a rate that out paces instruction. Fisher is a fantastic student with great talent and abilities. It has been a pleasure having him in my 5th period class. Keep up the great work Fisher!
