Erick Soliven

Erick is a student who always brightens a classroom with his cheerful attitude. This also applies to his interactions with peers and teachers, which are exceedingly positive. Erick regularly advocates for himself in the classroom, which is so vital for a second language learner and he is always asking questions and clarifying expectations so that he can complete his best possible work. Erick is a joy to have in class and the level of respect, conscientiousness, and positivity that he demonstrates every day will benefit him greatly in the future.
