## Academic Excellence in English

### Kylie Jordinelli

*Many students can jump through the academic hoops of homework, quiz, and exam, and earn top marks, but what distinguishes Kylie is how she brings a unique ear to the reading and writing of the English language. Though she may appear reserved and aloof in discussion, her remarks indicate an exquisite awareness of the multidimensional and complex relationships that exist in the vast and challenging rhetoric of English. She speaks clearly and succinctly while saving the real artistry for her writing. She writes with the organization of a student who thrives on complex problems and engaging enigmas but it is the innate quality of her written word that truly makes her work a pleasure for any audience. Metaphor and figuration move easily in and out of her syntax and without fail her read is never left looking for the word she meant to use, for she has provided it and done so aptly.*
