

Shaping Alaska's Future

Academic Excellence in Welding

Tyler Wietfeld

Tyler is a fourth-year welder who has completed multiple industry certifications. This is quite the accomplishment for a professional welder let along a high school student. Tyler's attention to detail and quality of work have turned him into the go to guy when complicated welding projects arise. Tyler has been a real pleasure to have in class and I look forward to seeing what he accomplishes before graduating and going off to AVTEC to pursue additional welding training.
