

Shaping Alaska's Future

Academic Excellence in Mathematics

Diane Alonzo

Diane is an amazing student in Precalculus. She gives every task the devotion it deserves. She holds herself accountable as she strives to master trigonometry. She has a mixture of both talent and humbleness. So much of being an excellent student of mathematics is allowing enough time and attention for the journey of making it your own, of reinventing it for yourself. I am deeply honored by Diane's consistent pursuit of mathematical excellence.
