

# Shaping Alaska's Future

## Academic Excellence in ELAP

### Lance Jaochico

*Our English Language Acquisition Program is happy to announce that Lance Jaochico is our choice for the Academic Excellence Award. I have known Lance for two years both as a student in my English class as well as Academic Transitions. Rarely have I had a student who remained as focused and determined to do well as Lance has. Not only does he give his full attention to every assignment and project, but he successfully remains friends with those around him while ignoring their behavior! Lance takes a serious attitude toward his work and his education. Other students like to have him as a work partner because they know Lance will do a good job explaining the assignment and the work product will be high quality. We are also impressed with Lance's good character. Not only is he willing to help others, but I have never seen him act in any way that didn't demonstrate he was thinking of others or making good, positive decisions. It has been a great pleasure to have Lance in class. I've enjoyed his polite, cheerful personality very much and I know a great future awaits him!*
