

Shaping Alaska's Future

Academic Excellence in Automotive Technology

Michaela Zurflueh

Michaela has had an excellent semester in the Basic Auto course. Her enthusiasm, willingness to learn, and her ability to help others has been a huge asset to those in the class. She has developed an excellent understanding of the mechanical concepts and has the work skills to be successful in many areas both in school and out of School. Michaela always goes the extra mile to ensure that her work is done properly and thoroughly. Though she has been nominated for this award in the past, she has far surpassed her peers in the Automotive class this year.
