

# Shaping Alaska's Future

## Academic Excellence in Mathematics

### Solomon Himelbloom

*Solomon Himelbloom is deserving of the award in Academic Excellence. As a freshman in Geometry, he has consistently pushed himself to achieve at the highest levels of understanding. He does all of his homework, gets 3's and 4's on all of his tests, asks great questions, and makes important contributions to class discussions. He even thinks about what might be beneficial to the other students in the class. What a privilege to have taught this wonderful young man. He's super kind, to boot!*
