

Shaping Alaska's Future

Academic Excellence in Fisheries

Triston Simeonoff

Triston has been a pleasure to have in class this semester, he has a good attitude and always comes prepared to participate. Triston has been very productive and motivated to learn, getting straight to work on his projects, and staying on task. He's had the chance to drive the K-HI-C, learned some new knots and improved his net mending and splicing. Triston has been fishing in the summers, and I have been happy to help him gain skills that will serve him on the job.
